Attorney Docket No.: Q87540

AMENDMENT TO THE SPECIFICATION

Please replace the 2nd full paragraph on page 1 of the Specification with the following amended paragraph:

Usually, in a vehicle or the like, a plurality of electric devices are electrically connected to one another by a plurality of electric wires (referred to frequently and simply as wires). The wires are bundled, by an insulation locking band, tape or the like, into a single bundle as so-called wire harness which is extendedly arranged at predetermined locations of the automobile or the like. In some cases, the wires are protected by a wire protecting member such as a grommet, and are arranged at a predetermined part. In other cases, the wires are arranged at a predetermined part of the vehicle or the like, while not bundled into one line and/or not protected by the wire protecting members.
